

# New SprayMate Plus Fertilizer Applications

Before

John Blue  
Ground Drive System

## Advantages

- GPS allows accurate application rate regardless of speed
- Three volume counters keep track of volume applied by the field, by the job, and by running total
- Fingertip selection of rate per acre eliminates guess work and timely calibration of ground drive units
- Rate change on the go feature eliminates recalibration and allows change of rate in areas where fertilizer rate would be different i.e. dry land corners versus irrigated areas
- Variable rate capability allows the unit to be linked with consoles with map reading programs
- USB Thumb drive accessory will store application records which can be accessed by computer
- Elimination of ground wheels, bearings and chains, maintenance cost and time is reduced
- Can be used with any type of pumping system
- Used with a diaphragm pump maintenance cost and time can be greatly reduced
- The pump will only run at the speed necessary to deliver the needed volume, wear and tear is significantly reduced
- Comes ready to mount
- Knowledgeable experts are only a phone call away to troubleshoot any questions which may arise

# Spray Mate Plus™

**MICRO-TRAK™  
SYSTEMS, INC.**

Accurate and Affordable  
Electronics from Micro-Trak

## Simple Precision

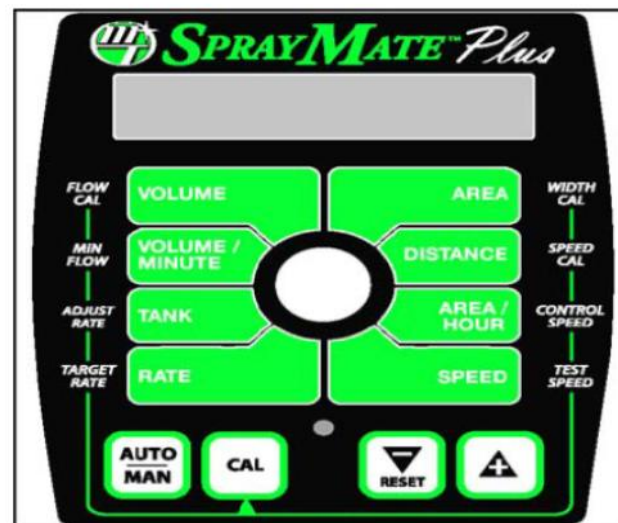

- **All-in-one design with built-in controls for up to 3 separate boom sections**
- **Master control switch standard • Standard On/Off power switch**
- **Start at selected speed and ramp up flow rate before tractor moves to achieve uniform delivery throughout row**
- **Automatic flow control to avoid false starts**

### Standard Features

- On-the-go rate adjustment in Auto control mode
- Push button auto/manual feature for spot treatment
- Precise rate control regardless of ground speed and field conditions
- Solenoid and ball valve compatible

### Advanced Features

- Flash memory for simple customization.
- Built-in capability for VRA.
- Records area and volume in 3 independent pairs of counters so individual rows may be tracked.
- Tank counter shows amount remaining in tank.
- Low Tank Alarm: "Fill" flashes in display when tank level is low.
- Enhanced reliability, precision and accuracy
- Inline/bypass for servos.
- Troubleshooting enhancements including "No Speed" & "No Flow" messages.
- Custom pre-programming of grower information into controller.
